

Instructions for use and warning notice for banks.

Applies to our entire collection.

Generally:

- Use the bank only for its intended purpose.
- The supplied assembly instructions as well as the quality pass with important care instructions as well as further information on material properties and product properties must be observed. Keep them.
- For further information, the QR code on the bank can be scanned.
- The bank must be placed onto a steady and even floor.
- Use the sliders suitable for the floor.
- The maximum distributed load of 280 kg must not be exceeded.
- Check all wood-, metal- and plastic connections. Tighten the screws if necessary.
- High lateral loads must be avoided in order to counteract the risk of the bank tipping over.
